

# Notes 1

---

## What is Markdown?

Markdown is a lightweight markup language that uses plain-text formatting syntax to create structured documents with headings, lists, bold, and italics, which can then be converted to multiple output files.

## What is Git?

Git is a distributed version control software system that is capable of managing versions of source code or data. It is often used to control source code by programmers who are developing software collaboratively.

## What is GitHub?

GitHub is a cloud-based platform built on Git that allows developers to store, manage, and share code, enabling real-time, collaborative software development and open-source projects.

## What is Slack?

Slack is a cloud-based collaboration and messaging app that serves as a secure, searchable "digital HQ" for teams to communicate, share files, and integrate with other tools, helping to streamline workflows and increase productivity.
